

## **ACI Mechanical and HVAC Sales Announces New Partnership with GPS Air**

*Ionization Experts Plan Growth with Pacific Northwest Manufacturers Rep*

**July 19, 2022** - ACI Mechanical and HVAC Sales announces a new partnership with GPS Air, a leading manufacturer of ionization technology including Needlepoint Bipolar Ionization. This new relationship will cover GPS's industry-leading suite of products to help indoor air quality in all ACI territories including Washington, Oregon, and Northern Idaho.

Needlepoint Bipolar Ionization (NPBI) technology is an efficient way to keep buildings safe making GPS highly relevant in today's society. From healthcare buildings to schools, having an environment that is a safe space for the occupants is their top priority. GPS uses stringent laboratory testing to ensure the safety and efficiency of their products, including the CI-2 with its auto cleaning technology.

How does it work? Eliminating airborne particles, odors, pathogens, and other pollutants is done by ions being released into the airstream through existing HVAC systems. The positive and negative charged ions traveling through the air stream target contaminants to filter. GPS has proven that no ozone or other harmful by-products exist with their technology at work.

"We are very impressed with the technology GPS inserts into their line. They are unique in their ability to maximize clean air through Needlepoint Bipolar Ionization. Their advancement in state-of-the-art products gives our customers an extra push to create a safe space for occupants," said Keith Glasch, President of ACI.

### **About ACI Mechanical and HVAC Sales**

Headquartered in Seattle, Washington, ACI is the Pacific Northwest's vendor of choice for commercial HVAC applications. ACI partners with consulting engineers, contractors, and their customers, to help buildings thrive. Solutions include applications for education, data centers commercial office buildings, healthcare, and industrial facilities. Our team includes thirty-five degreed sales engineers and project professionals working with over fifty equipment manufacturers. Visit [acimechsales.com](http://acimechsales.com) for more information.

### **About Global Plasma Solutions**

With over 30 patents and more than 250,000 installations worldwide using our NEEDLEPOINT BIPOLAR IONIZATION technology, also known as NPBI, GPS is truly the Indoor Air Quality (IAQ) revolutionizer. Our proven technology delivers clean indoor air that is safe and healthy - producing neither ozone nor other harmful by-products. All our NPBI products are UL and CE approved. Through NPBI, our products purify the air by eliminating airborne particulates, odors and pathogens. The combined effect is a lowered carbon footprint for your facility and up to 30% energy savings through a reduced (up to 75%) outdoor air intake.
