

Expert VRF Sales Engineer to expand ACI Seattle Branch's growth

We are excited to announce Mike Manley has joined ACI Mechanical & HVAC Sales as a VRF Sales Engineer. His extensive knowledge in Variable Refrigerant Flow products will not only help create partnerships with customers but help ACI build a stronger VRF base.

In Mike's career he has 30 years of experience in the Seattle market, and a majority of those years he was working in wholesale distribution. His jobs ranged from warehouse, delivery, purchasing, estimating and sales. The last 14 years he spent as a commercial Territory Manager for unitary and VRF products. This has provided him with the needed knowledge that will help ACI grow in the VRF market.

"I'm so happy to be joining ACI – I'm looking forward to working for a company whose values align with mine. I'm excited to focus on our new VRF line and growing our market presence with Carrier & Toshiba/Carrier in Western Washington." Mike Manley said about his new position.

As the new VRF Sales Engineer Mike will provide leadership skills, give timely responses with accurate and up to date information, and employ his 30 years of construction & VRF knowledge to help drive sales for ACI Mechanical & HVAC Sales
