

ACI Mechanical Adds Dynamic Air Technology (DAT) to Their Line Card

Pacific Northwest Manufacturers Representative Plans Growth with Commercial Equipment

February, X, 2024 (Seattle/Portland/Spokane) — ACI Mechanical & HVAC Sales is proud to announce the expansion of their product offerings with the inclusion of Dynamic Air Technology's line of custom air handling units. These quality engineered AHUs range from 200 to 150,000 CFM. Adding DAT addresses a growing need for high level engineered custom equipment. This new relationship will cover all ACI's territories in Seattle, Spokane, Portland, and Northern Idaho.

"As engineers, we're excited to integrate Dynamic Air Technology's custom air handling units into our projects. Their precision engineering and attention to detail align perfectly with our commitment to delivering tailored solutions that exceed our clients' expectations. With DAT's custom units, we have the flexibility to address even the most complex HVAC challenges with confidence."

Dynamic Air Technology's (DAT) custom air handling units are engineered with precision and attention to detail, utilizing advanced design principles and state-of-the-art manufacturing techniques. Each unit is tailored to the specific requirements of the project, considering factors such as air volume, temperature control, humidity levels, and filtration needs. DAT's custom solutions integrate cutting-edge components, such as high-efficiency fans, variable speed drives, and advanced control systems, to optimize performance and energy efficiency. Additionally, DAT's expertise in airflow dynamics and system integration ensures seamless operation and compatibility with existing HVAC infrastructure. With DAT's custom air handling units, clients benefit from bespoke solutions that deliver superior air quality, comfort, and reliability in diverse applications and environments.

"Working with DAT allows us to provide engineers and design build contractors with comprehensive solutions", says Keith Glasch, President of ACI. "With DAT's solutions, we're confident in our ability to provide unmatched quality and performance, reinforcing our position as a leader in the industry."

About ACI Mechanical and HVAC Sales:

Headquartered in Seattle, Washington, ACI Mechanical & HVAC Sales is the Pacific Northwest's premier vendor for commercial HVAC applications. The company collaborates with consulting engineers, contractors, and their customers to deliver exceptional solutions for various sectors, including education, data centers, commercial office buildings, healthcare, and industrial facilities. With a team of thirty-six degreed sales engineers and project professionals working with over fifty equipment manufacturers, ACI is committed to helping buildings thrive.
